- 2019 Calendar & Checklist 13
- Legislative Day Save the Date 17
- Online Learning 39
- Advertising Rate & Details..... 41

About the Cover: Winter can bring many obstacles to firefighters including slippery streets, frozen hose lines, and hidden fire hydrants. Snow can prove especially challenging when trying to fight fires because in many cases it makes fire hydrants hard to see or access. If there's a fire hydrant near your home that is covered with snow, do your part to keep it accessible this winter!

- Remove all snow and ice from hydrant so it is clearly visible
- Clear at least a 3 foot radius around the hydrant so firefighters have full access
- Make a path from the hydrant to the street for easier accessibility

Remember, a few minutes of work now can make all the difference later!
